ROHIT MANDAL

Product and Project Manager

Hyderabad, India | mandalrohit0583@gmail.com | +91 9056194670 | linkedin.com/in/rohit-agile-pm

PROFESSIONAL SUMMARY

Product and Project Manager with 7+ years delivering enterprise DERMS and smart-grid platforms for Fortune 500 clients including Google, Honeywell and Tesla. Certified Scrum Master who owns the full product lifecycle, from discovery and roadmap to UAT and go-live, with **25+ releases shipped at a 95%+ on-time rate** and zero critical post-release incidents. Launched a self-service enrollment portal (**10,000+ sign-ups**) and scaled a smart thermostat program to **50,000+ households**.

CORE SKILLS

Product Management: Product Roadmap, Product Lifecycle Management, Requirements Gathering, User Stories & Acceptance Criteria, Backlog Prioritization, Functional Specifications, Solution Design, Scope Management

Project & Agile Delivery: Agile, Scrum (CSM), SAFe, Sprint Planning, Release Management, Change Management, Risk Management, UAT & Go-Live, Budget & Resource Planning, Variance Analysis

Stakeholder & Vendor Management: Client Relationship Management, Cross-Functional Leadership, Fortune 500 Vendor Liaison (Google, Honeywell), Third-Party Integrations, Expectation Management

Analytics & Tools: Jira, Confluence, Azure DevOps, SQL, API Integration, KPI Dashboards, Velocity & Burndown Tracking, C4 Solution Diagrams

Domain: DERMS, Smart Grid, Demand Response, SCADA Integration, EV Charging, Residential Battery Storage, Smart Thermostat Programs

PROFESSIONAL EXPERIENCE

Open Access Technology India (OATI), Hyderabad, India

Product and Project Manager, OATI **May 2021 – Present**

- Own the product roadmap and backlog prioritization for **2 cross-functional squads**, aligning delivery with business objectives, security compliance and evolving utility regulations; convert client use cases into user stories and acceptance criteria, cutting requirement-related rework by **20%+** and improving sprint predictability.
- Run product discovery with utility and enterprise clients through use-case workshops and delivery reviews, turning customer needs into prioritized roadmap items with measurable acceptance criteria.
- Serve as primary point of contact and Subject Matter Expert for Fortune 500 stakeholders (Google, Honeywell, Tesla) and Release Train Engineers, running client delivery reviews across **10+ key accounts** that reduced recurring escalations and strengthened renewal conversations.
- Present roadmap status, risks and delivery metrics to client executives and internal leadership, enabling timely decisions on scope, priorities and trade-offs.
- Own release and change management: delivered **25+ production releases** at a **95%+ on-time rate** with **zero critical post-release incidents**, and resolved **40+ change requests annually** with no missed go-live dates.
- Manage third-party vendor and partner integrations, coordinating requirements and timelines across external teams to deliver **15+ integrations on schedule** with **zero rollback incidents**.
- Balance competing priorities across concurrent programs (DERMS, EV charging, battery storage, smart thermostat) and manage cross-team dependencies through Scrum of Scrums and release-train planning, preventing delivery bottlenecks.
- Lead Agile ceremonies (Sprint Planning, Stand-ups, Reviews, Retrospectives, Scrum of Scrums) and track delivery health through KPI dashboards, velocity, burndown, budget logs and variance analysis, escalating risks early to keep scope, cost and timelines on track.
- Partner with Security, QA and Development teams to configure complex application workflows and redesign end-user experiences, reducing root-cause application failures by **20%** and improving reliability and usability.
- Drive continuous improvement through retrospectives and delivery metrics, and mentor team members on user story writing, UAT planning and Agile practices, raising requirement quality and delivery discipline across squads.

Analyst, OATI **Apr 2019 – May 2021**

- Led requirement gathering and solution mapping, producing project scopes and Requirement Traceability Matrices (RTM) for **50+ multi-utility software rollouts**, bridging client needs with technical architecture teams.
- Planned and executed **100+ UAT test plans** across 50+ rollouts, ensuring production-ready quality and successful go-live.
- Built KPI dashboards and performance-tracking logs that supported data-driven decisions for senior leadership.

KEY PROJECTS

- **Public Customer Enrollment Portal:** Conceived and delivered a self-service portal for residential and commercial customers of utilities without a Customer Information System (CIS), driving **10,000+ sign-ups** and eliminating manual enrollment processing.
- **Smart Thermostat Program (Google, Honeywell & Partners):** Served as direct technical liaison, aligning requirements and implementation to scale the program to **50,000+ enrolled households** across North America.
- **EV Charging & Residential Battery Storage:** Led end-to-end integration across **38 Electric Membership Cooperatives (EMCs)**, driving 15–20% energy savings for enrolled customers.
- **Distributed Energy Resource Management System (DERMS):** Delivered end-to-end solutions with consistent on-time release of critical features despite evolving regulations, prioritizing the Jira backlog for demand-response infrastructure across legacy SCADA integrations.

EDUCATION

B.E., Electronics & Communication Engineering, Chandigarh University, 2015–2019

CERTIFICATIONS

Certified ScrumMaster (CSM), Scrum Alliance

Professional Agile Coach, UpGrad
